

Digital Force Gauges

DFS Series

Value packed - the ultimate in accuracy and sophisticated features!

Microprocessor-controlled, the DFS series represents a unique approach to force testing. Designed to be handheld or stand mounted, the DFS features many advanced functions typically included on gauges costing twice as much. Intelligent and versatile, these high performance gauges are easily user configured for sampling and display update rate, units of measure, baud rate, data output stream, memory type and high and low set points. Large memory capacity (100 samples) and on board statistical processing allows the DFS series to operate with or without computer control. Additionally, each gauge possesses three types of signal outputs for data collection and function analysis.
